# Albi Beamer Theme

## Documentation

**Paul Gaborit**

Albi, France

April 8, 2025

## Part 1 User manual

### 1 Usage

- Albi theme and options
- Title page
- Logos

### 2 Colors and texts

- Color scheme
- Text sizes
- Blocks

### 3 Customizations

- Special pages: title, part, section
- Frame title, headline and footline
- Blocks

## Part 2 Epilogue

Part I  
**User manual**

## How to use Albi theme

5/22

- In the preamble of the beamer document:

```
\usetheme{Albi}
```

- Boolean options:

`compactfootline` Compact the footline (initially: `false`).

`compacttitle` Compact the frame title (initially: `false`).

`partpage` Add a part page at the beginning of every part  
(initially: `true`).

`sectionpage` Add a section page at the beginning of every section  
(initially: `true`).

```
% compact
```

```
\usetheme[compactfootline,compacttitle]{Albi}
```

```
% suppress part pages and section pages
```

```
\usetheme[partpage=false,sectionpage=false]{Albi}
```

- Change options during the document:

```
\Albikeys{compactfootline,compacttitle,partpage=false,sectionpage=false}
```

## How to insert a title page

6/22

- In the preamble of the beamer document:

```
\title{A Good Title}
\subtitle{with a good subtitle} % optional
\author{My name}
\institute{Organization name}
\date{\today}
\logo{\includegraphics{logo}}
```

- To insert a title page:

```
\begin{frame}[plain]
  \titlepage
\end{frame}
```

or

```
\begin{frame}[plain]
  \maketitle
\end{frame}
```

## How to choose logos

7a/22

- Via a picture (`mylogo.pdf`, `mylogo.png` or `mylogo.jpg`):

```
\logo{\includegraphics{mylogo}}
```

or:

```
\Albiisetlogofilename{mylogo}
```

or:

```
\Albikeys{all logos=\includegraphics{mylogo}}
```

 The logo picture is automatically scaled and inserted in the *footline*, *title page*, *part pages* and *section pages*.

## How to choose logos

7b/22

- With different logos:

```
\Albikeys{  
    footnote logo={\includegraphics{logo-for-footline}},  
    logo={\includegraphics{logo-for-title-page}},  
    part logo={\includegraphics{logo-for-part-page}},  
    section logo={\includegraphics{logo-for-section-page}}}  
}
```

👉 Logos pictures are automatically scaled and inserted in the *footline*, *title page*, *part pages* and *section pages*.

## How to choose logos

7c/22

- Using any L<sup>A</sup>T<sub>E</sub>X code (as in this document):

```
\Albikeys{  
    all logos={%  
        \begin{tikzpicture}  
            \node[node font=\Large\bfseries,inner xsep=1em,  
                  inner ysep=.5em,fill=cyan!50!green,text=white]  
                {\rotatebox{30}{Logo}};  
        \end{tikzpicture}%  
    },  
}
```

- 👉 Content is automatically scaled and inserted in the *footline*, *title page*, *part pages* and *section pages*.
- ⚙️ Scaling is computed according to the bounding box of the provided code.
- 👉 A specific code can be provided to each specific key ([footline logo](#), [logo](#), [part logo](#) and [section logo](#)).

# Part I

## User manual

### 1 Usage

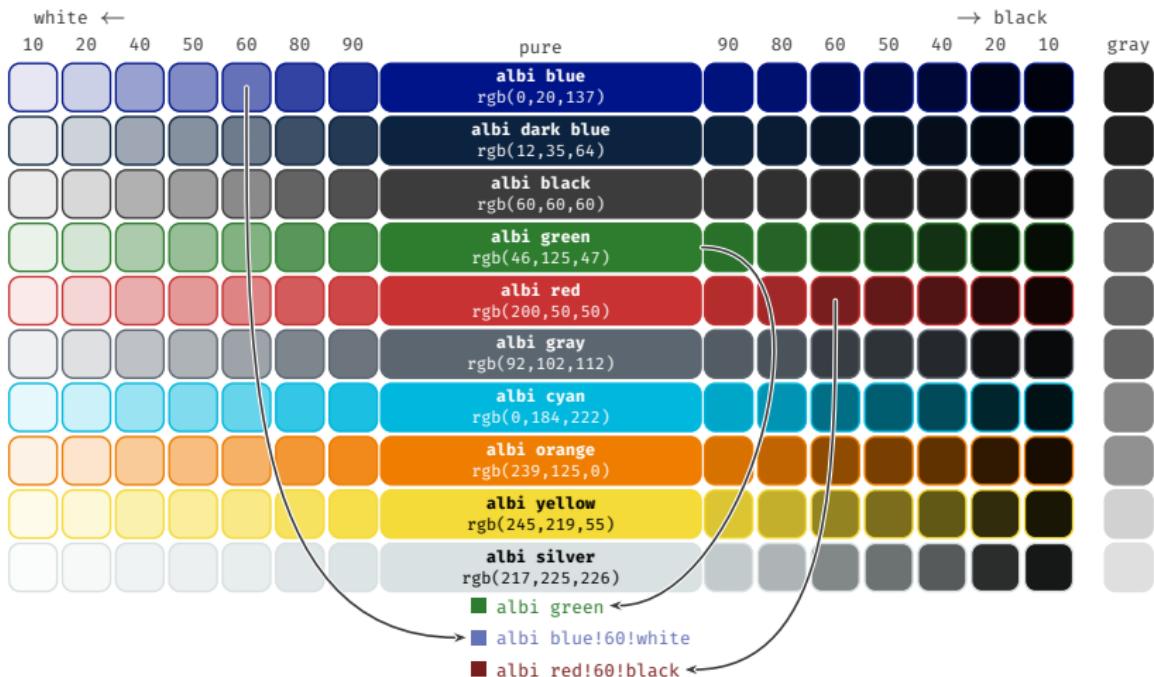

### 2 Colors and texts

- Color scheme
- Text sizes
- Blocks

### 3 Customizations

Logo

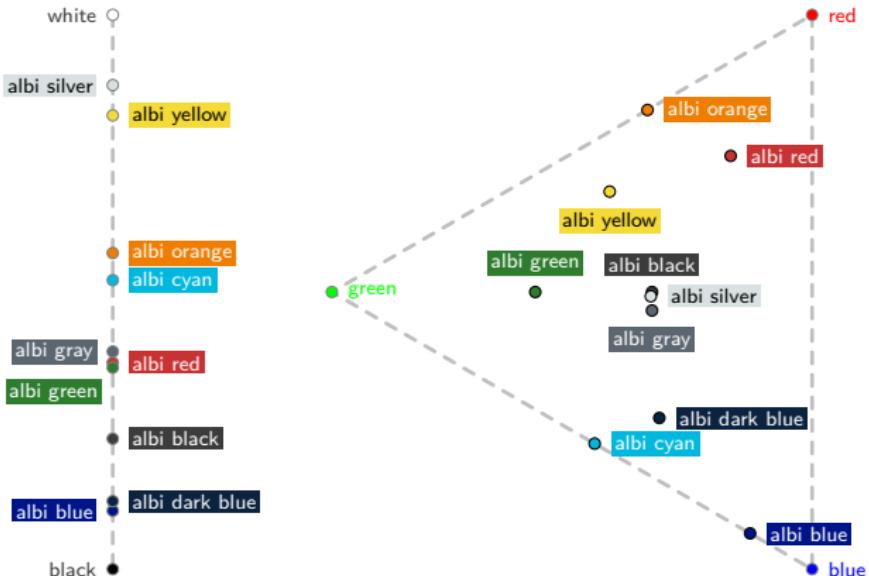

## Color scheme

- ⚙ All colors are also defined as `beamer-color` (with black or white background color).

## Distribution in color space

10/22

## Text sizes

11/22

\TINY Example

\Tiny Example

\tiny Example

\semitiny Example

\scriptsize Example

\footnotesize Example

\small Example

\normalsize Example

\large Example

\Large Example

\LARGE Example

\huge Example

\Huge Example

\HUGE Example

👉 \HUGE and \semitiny don't exist in beamer

## Blocks

12/22

```
\begin{block}{Title}
Content of \texttt{block}...
\end{block}
```

Title

Content of block...

```
\begin{alertblock}{Title}
Content of \texttt{alertblock}...
\end{alertblock}
```

Title

Content of alertblock...

```
\begin{exampleblock}{Title}
Content of \texttt{exampleblock}...
\end{exampleblock}
```

👉 Do not overuse it !

# Part I

## User manual

### 1 Usage

### 2 Colors and texts

### 3 Customizations

- Special pages: title, part, section
- Frame title, headline and footline
- Blocks

Logo

## Customize the title page

14/22

The predefined option `[albi]` (*beamer-template title page*) is divided into four areas:

- 1 the logo area (*beamer-color albi title page.logo*) contains the logo.

```
\setbeamercolor{albi title page.logo}{fg=black,bg=white}
```

- 2 the title area (*beamer-color albi title page.title*) contains the title (*beamer-font/-color title*) and the subtitle (*beamer-font/-color subtitle*).

```
\setbeamercolor{albi title page.title}{use=albi orange,fg=albi orange.bg,bg=albi orange_fg}  
\setbeamertfont{title}{series=\bfseries,size=\LARGE}
```

- 3 the author area (*beamer-color albi title page.author*) contains the author (*beamer-font/-color author*), the institute (*beamer-font/-color institute*), date (*beamer-font/-color date*) and titlegraphic (*beamer-font/-color titlegraphic*).

```
\setbeamercolor{albi title page.author}{use=albi cyan,fg=albi cyan.bg,bg=albi cyan_fg}  
\setbeamertfont{author}{series=\bfseries,size=\large}
```

- 4 the empty area (*beamer-color albi title page.empty*).

```
\setbeamercolor{albi title page.empty}{use=albi dark blue,fg=albi dark blue.bg,bg=albi dark blue_fg}
```

## Customize part pages

15/22

The predefined option `[albi]` (*beamer-template part page*) is divided into three areas:

- 1 the empty area (*beamer-color albi part page.empty*).

```
\setbeamercolor{albi part page.empty}{use=albi orange,fg=albi orange.bg,bg=albi orange.fg}
```

- 2 the title area (*beamer-color albi part page.title*) contains the part name (*beamer-font/-color part name*) and the part title (*beamer-font/-color part title*).

```
\setbeamercolor{albi part page.title}{use=albi cyan,fg=albi cyan.bg,bg=albi cyan.fg}  
\setbeamertemplate{part name in part page}{parent=part name}  
\setbeamertemplate{part title in part page}{parent=part title}
```

- 3 the logo area (*beamer-color albi part page.logo*) contains the logo.

```
\setbeamercolor{albi part page.logo}{fg=black,bg=white}
```

## Customize section pages

16/22

The predefined option `[albi]` (*beamer-template section page*) is divided into three areas:

- 1 the toc area (*beamer-color albi section page.toc*) contains the table of content of the current part with current section details.

```
\setbeamercolor{albi section page.toc}{parent=normal text}
```

- 2 the part area (*beamer-color albi section page.part*) contains the part name (*beamer-font/-color part name in section page*) and the part title (*beamer-font/-color part title in section page*).

```
\setbeamercolor{albi section page.part}{use=albi orange,fg=albi orange.bg,bg=albi orange.fg}
\setbeamertemplate{part name in section page}{parent=part name,size=\normalsize}
\setbeamertemplate{part title in section page}{parent=part title,size=\normalsize}
```

- 3 the logo area (*beamer-color albi section page.logo*) contains the logo.

```
\setbeamercolor{albi section page.logo}{use=albi silver,fg=albi silver.bg,bg=albi silver.fg}
```

- The predefined option `[albi]` (*beamer-template frametitle*) displays the frame title (*beamer-font/-color frametitle*), the frame subtitle (*beamer-font/-color framesubtitle*) if exists and the frame number (*beamer-font/-color frame number*).

- Predefined options for frame number (*beamer-template frame number*):

`[none]` no frame number.

`[frame]` frame number.

`[frame with total]` frame number/total.

`[frame+slide]` frame number with slide number if exists.

`[frame+slide with total]` frame number with slide number if exists/total

- The default option is `[frame+slide with total]`:

```
\setbeamertemplate{frame number}[frame+slide with total]
```

## Headline (navigation bar)

18/22

- The predefined option `[albi]` (`beamer-template headline`) displays on the...
  - ...left all sections (`beamer-template/-font/-color section in head/foot`) with the current section highlighted (`beamer-template section in head/foot shaded`).
  - ...right all subsections (`beamer-template/-font/-color subsection in head/foot`) of the current section with the current subsection highlighted (`beamer-template subsection in head/foot shaded`).

```
\setbeamercolor{section in head/foot}{use=albi dark blue,fg=albi dark blue.bg, bg=albi dark blue.fg}  
\setbeamercolor{subsection in head/foot}{use=albi orange,fg=albi orange.bg, bg=albi orange.fg}  
  
\setbeamertemplate{section in head/foot}{parent={headline},series=\bfseries}  
\setbeamertemplate{subsection in head/foot}{parent={headline},series=\bfseries}
```

👉 The predefined options `[albi with number]` (`beamer-template section in head/foot`) (`beamer-template subsection in head/foot`) displays the number of sections and subsections. The default predefined option is `[albi]`.

👉 The headline can be *compressed* (showing only current section and subsection) using the class option or the theme option `compress`:

```
\documentclass[compress]{beamer}  
  
\Alibikeys{compress=true}
```

- The predefined option `[albi]` (*beamer-template footnote*) displays:
  - the footnote logo if defined (*albi-keys footnote logo*),
  - the title (*beamer-font/-color title in head/foot*) and the date (*beamer-font/-color date in head/foot*),
  - the author (*beamer-font/-color author in head/foot*) and the institute (*beamer-font/-color institute in head/foot*),
  - others logos if defined (*albi-keys other logos list*).

```
\setbeamercolor{footline}{fg=black,bg=albi silver}
\setbeamercolor{author in head/foot}{parent=footline}
\setbeamercolor{date in head/foot}{parent=footline}
\setbeamercolor{title in head/foot}{parent=footline}
\setbeamercolor{institute in head/foot}{parent=footline}

\setbeamertemplate{author in head/foot}[parent={footline}]
\setbeamertemplate{title in head/foot}[parent={footline}]
\setbeamertemplate{institute in head/foot}[parent={footline}]
\setbeamertemplate{date in head/foot}[parent={footline}]
```

- 👉 The *other logos list* is a list (possibly empty) of pairs *image/width*:

```
\Albikeys{other logos list={example-image-b/8mm,example-image-c/4mm,example-image-a/7mm}}
```

## Blocks with custom colors

20/22

- Default colors :

Title (block)

Content...

Title (alertblock)

Content...

Title (exampleblock)

Content...

- Custom colors :

```
\setbeamercolor{block title}{bg=albi orange,fg=white}
\setbeamercolor{block body}{bg=albi orange!10!white,fg=albi black}
```

```
\setbeamercolor{block title alerted}{bg=albi gray,fg=white}
\setbeamercolor{block body alerted}{bg=albi black!10!white,fg=albi black}
```

```
\setbeamercolor{block title example}{bg=albi blue,fg=white}
\setbeamercolor{block body example}{bg=albi blue!10!white,fg=albi black}
```
